- JavaScript : Infosys Springboard
- CSS3 : Infosys Springboard
- HTML : Infosys Springboard
- Java : Coursera

Profile Summary

I'm a frontend developer who enjoys building things that people actually use. With a background in Computer Science and a hands-on approach to learning, I work comfortably with React.js, JavaScript, Tailwind CSS, and know how to turn an idea into a usable, responsive UI. More than just writing code, I care about how users experience it—and I'm always looking to improve both my skills and the things I build. Eager to contribute to impactful web solutions in a growth-driven organization
